community outreach &
dermatology education

CODE: Community Outreach & Dermatology Education

PROJECT GOALS

- CREATE a teleconferencing system to connect dermatologists in the PNW
 - <https://codederm.ohsu.edu>
- SHARE challenging cases in dermatology for peer consultation
- CONTRIBUTE to resident education
- INCREASE access to specialized and general dermatology knowledge
- DELIVER CME
- INCREASE professional satisfaction
- LINK peers and foster community relationships
- IMPROVE access to care in RURAL/UNDERSERVED communities
- SUPPORT recruitment of dermatologists to rural communities

Secure teleconference platform developed for CODE

The screenshot displays the CODE website interface. At the top, the logo 'CODE Community Outreach & Dermatology Education' is visible. Below it is a navigation bar with links for HOME, CALENDAR, HOW IT WORKS, PRESENTING A PATIENT, DIDACTIC PRESENTATIONS, and CONTACT US. A user profile 'Hello Melinda!' is shown on the right. A secondary navigation bar includes links for Participants, New Registrations, and Reporting. The main content area features the CODE logo on the left and an 'UPCOMING CONFERENCE' announcement on the right. The announcement specifies the date and time (01/09/2019 12:30 pm - 05:00 pm) and lists three adult speakers: Christa Slaught, Maeran Landers, and Teri Greiling. Two buttons, 'View Details' and 'Join Now', are provided for the conference.

Dermatology Morphology Conferences

Our goal is to help increase professional satisfaction by linking peers and fostering community relationships.

CODE seeks to correct under-representation of dermatologists in Oregon's rural communities

Participant Survey Responses:
Objectives for Presenting

CODE research study

- Patients, presenters, and participants of the conference were asked to participate in a survey study to track conference participation and case characteristics over time.
- Data from these surveys was collected in a **secure research repository** for future study.
- We used survey data to improve the conference format and identify skin conditions that need further research and study.

Presenter Objectives

- 21% of participants felt that presenting a patient's case through CODE prevented the need for an additional referral/consultation.
- On average, presenting a case through CODE saved patients 55 miles of travel one-way.
- CODE participants felt more confident managing their patient's skin condition.
