# Pfizer Announces a Research Grant RFP Inflammatory and Immune-Mediated Dermatologic Disorders

. Ir=

Competitive Grant Program- using Expert Review Panel

Pfizer Global Medical Grants (GMG) supports the global healthcare community's independent initiatives (e.g., research, quality improvement or education) to improve patient outcomes in areas of unmet medical need that are aligned with Pfizer's medical and/or scientific strategies.

Pfizer's GMG competitive grant program involves a publicly posted Request for Proposal (RFP) that provides detail regarding a specific area of interest, sets timelines for review and approval, and uses an expert review panel (ERP) to make final grant decisions. Organizations are invited to submit an application addressing the specific gaps in research, practice or care as outlined in the specific RFP.

For all Investigator Sponsored Research (ISRs) and general research grants, the grant requester (and ultimately the grantee) is responsible for the design, implementation, sponsorship, and conduct of the independent initiative supported by the grant, including compliance with any regulatory requirements. Pfizer must not be involved in any aspect of study protocol or project development, nor the conduct or monitoring of the research program.

## **Competitive Grant Program Eligibility**

Geographic Scope	United States
Applicant Eligibility Criteria	<ul> <li>To be eligible:</li> <li>The institution and principal investigator (PI) must be based in one of the eligible countries noted above.</li> <li>Only organizations are eligible to receive grants, not individuals or medical practice groups.</li> <li>The applicant (PI) must have a medical or postdoctoral degree (MD, PhD, or equivalent), an advanced nursing degree (BSN with a MS/PhD), or a degree in Pharmacy, Physiotherapy, or Social Work.</li> <li>Applicant must be affiliated with a host institution</li> <li>[Optional] Both early career and experienced investigators are encouraged to apply and consideration will be given to all proposals meeting the selection criteria</li> </ul>

## Requirements

Date RFP Issued	December 2, 2020
Clinical Area	Inflammatory and Immune-mediated Dermatologic Disorders
Area of Interest Focus	The intent of this Request for Proposal (RFP) is to support preclinical, clinical and outcomes research through a competitive grant program with the intent to increase medical knowledge in the diagnosis and management of inflammatory and immune-mediated dermatologic disorders.
	Areas of Research Focus
	<ul> <li>Mechanistic insights into the role of the JAK/STAT pathway in inflammatory dermatologic diseases</li> </ul>
	<ul> <li>Pharmacogenomic studies in atopic dermatitis to identify potential responders to JAK inhibition, including skin of color</li> </ul>
	Unmet need and burden of disease of alopecia areata and vitiligo
	Epidemiological studies in alopecia areata
	<ul> <li>Validation of AD disease severity measures in skin of color</li> </ul>

<ul> <li>Identification of inflammatory pathways related to the pathophysiology or alopecia areata and vitiligo</li> <li>Identification of immunophenotypic differences in clinical course and treatment response of AD in skin of color</li> <li>Out of Scope         <ul> <li>Research proposals that conflict with ongoing Pfizer-sponsored trials or future development plans are out of scope.</li> <li>Research proposals that require drug supply for investigational JAK-inhibitors</li> </ul> </li> <li>Individual projects requesting up to \$175,000 will be considered. Pfizer anticipates awarding up to 8 grants</li> <li>The amount of the grant Pfizer will be prepared to fund for any project will depend upon the expert review panel's evaluation of the proposal and costs involved, and will be stated clearly in the approval notification</li> <li>Key Dates</li> <li>RFP release date: December 2, 2020</li> </ul>
treatment response of AD in skin of color         Out of Scope         • Research proposals that conflict with ongoing Pfizer-sponsored trials or future development plans are out of scope.         • Research proposals that require drug supply for investigational JAK-inhibitors         • Individual projects requesting up to \$175,000 will be considered. Pfizer anticipates awarding up to 8 grants         • The amount of the grant Pfizer will be prepared to fund for any project will depend upon the expert review panel's evaluation of the proposal and costs involved, and will be stated clearly in the approval notification
<ul> <li>Research proposals that conflict with ongoing Pfizer-sponsored trials or future development plans are out of scope.</li> <li>Research proposals that require drug supply for investigational JAK-inhibitors</li> <li>Individual projects requesting up to \$175,000 will be considered. Pfizer anticipates awarding up to 8 grants</li> <li>The amount of the grant Pfizer will be prepared to fund for any project will depend upon the expert review panel's evaluation of the proposal and costs involved, and will be stated clearly in the approval notification</li> </ul>
<ul> <li>Research proposals that conflict with ongoing Pfizer-sponsored trials or future development plans are out of scope.</li> <li>Research proposals that require drug supply for investigational JAK-inhibitors</li> <li>Individual projects requesting up to \$175,000 will be considered. Pfizer anticipates awarding up to 8 grants</li> <li>The amount of the grant Pfizer will be prepared to fund for any project will depend upon the expert review panel's evaluation of the proposal and costs involved, and will be stated clearly in the approval notification</li> </ul>
future development plans are out of scope.         • Research proposals that require drug supply for investigational JAK- inhibitors         • Individual projects requesting up to \$175,000 will be considered. Pfizer anticipates awarding up to 8 grants         • The amount of the grant Pfizer will be prepared to fund for any project will depend upon the expert review panel's evaluation of the proposal and costs involved, and will be stated clearly in the approval notification
<ul> <li>inhibitors</li> <li>Expected Approximate Monetary Range of Grant Applications</li> <li>Individual projects requesting up to \$175,000 will be considered. Pfizer anticipates awarding up to 8 grants</li> <li>The amount of the grant Pfizer will be prepared to fund for any project will depend upon the expert review panel's evaluation of the proposal and costs involved, and will be stated clearly in the approval notification</li> </ul>
Monetary Range of Grant Applications       anticipates awarding up to 8 grants         • The amount of the grant Pfizer will be prepared to fund for any project will depend upon the expert review panel's evaluation of the proposal and costs involved, and will be stated clearly in the approval notification
will depend upon the expert review panel's evaluation of the proposal and costs involved, and will be stated clearly in the approval notification
REP release date: December 2, 2020
Full Proposal due date: February 24, 2021
Review of Full Proposals by ERP: April 2021
Anticipated Full Proposal Notification Date: June 2021
• Please go to <u>ww.cybergrants.com/pfizer/Research</u> and sign in. First- time users should click "Create your password".
Requirements for submission:
Select the following Competitive Grant Program Name:
2020 I&I L - Inflammatory and Immune-Mediated Dermatologic Disorders
Complete all required sections of the online application. See Appendix a for additional details
If you encounter any technical difficulties with the website, please click the "Technical Questions" link at the bottom of the page

Questions:	<ul> <li>If you have questions regarding this RFP, please direct them in writing to the Grant Officer, Derek Warnick (<u>derek.warnick@pfizer.com</u>), with the subject line "Inflammatory and Immune-Mediated Dermatologic Disorders."</li> <li>Please click <u>here</u> to view Frequently Asked Questions regarding the Competitive Grant Program</li> </ul>
Review and Approval Process	<ul> <li>Grant requests received in response to a specific RFP are reviewed by an expert review panel (ERP) to make final grant decisions.</li> <li>The panels are comprised of professionals from the medical community with advanced degrees and expertise in particular clinical areas, or specific needs of a geographic region/learner group, or expertise in research, continuing professional development or quality improvement</li> </ul>
Mechanism by which Applicants will be Notified:	<ul> <li>All applicants will be notified via email by the dates noted above</li> <li>Applicants may be asked for additional clarification during the review period</li> </ul>

#### Appendix A

#### Full Proposal/Protocol

Applications will be accepted via the online portal. Full Proposal/Protocol documents should be no longer than 10-15 pages in length (12-point font and 1-inch margins) excluding Organization Detail and References. When uploading your Full Proposal/Protocol please ensure it addresses the following:

Goals and Objectives	<ul> <li>Provide the main goal of the study and the study population (if applicable). Provide a detailed definition that is directly linked to the primary objective</li> </ul>
Assessment of Need for the Project	• This should reflect your study rationale. Provide a brief description of the medical/scientific question and the rationale of how this trial or study addresses the question
Target Audience	<ul> <li>Describe the primary audience(s) targeted for this project. For Investigator Sponsored Clinical Trials, please specify the age, gender and other demographic information for trial population</li> </ul>
	<ul> <li>Also indicate whom you believe will directly benefit from the project outcomes. Describe the overall population size as well as the size of your sample population</li> </ul>
Project Design and Methods	• Describe concisely the research design and methods for achieving the stated goals. For a clinical interventional study, include inclusion/exclusion criteria, treatment plan and statistical plan
Innovation	• Explain what measures you have taken to assure that this project idea is original and does not duplicate other projects. Describe how this project builds upon existing work, pilot projects, or ongoing projects developed either by your institution or other institutions related to this project
Evaluation and Outcomes	<ul> <li>Specify type and frequency of safety, efficacy, and/or outcome measures. Also indicate the method(s) used to assess measures</li> </ul>
	<ul> <li>Provide a publication plan describing intended submission of abstracts to (a) congress(es) or intended submission of (a) publication(s) to peer- reviewed journals. All publications must follow ICH guidelines</li> </ul>
Anticipated Project Timeline	<ul> <li>Provide an anticipated timeline for your project including project start/end dates</li> </ul>
Additional Information	If there is any additional information you feel Pfizer should be aware of concerning the importance of this project, please summarize here

	<ul> <li>Early-career applicants: Letter(s) of support from mentor(s) and collaborators describing how the award will advance the applicant's career.</li> </ul>
Organization Detail	• This information is used to assess the capability of the organizational resources available to perform the effort proposed. Identify the facilities to be used [laboratory, animal, clinical and "other"]. If appropriate, indicate their capacities, pertinent capabilities, relative proximity and extent of availability to the project
References	Bibliography of relevant references.
