

## **Cardiac Transthyretin Amyloid (ATTR) Fellowship Competitive Grant Program - Request for Proposals (RFP)**

### **Introduction**

The International Society of Amyloidosis (ISA) and Pfizer are collaborating to offer a new competitive grant opportunity focused on supporting fellowships in Cardiac Transthyretin Amyloid (ATTR).

The mission of the International Society of Amyloidosis (ISA) is to promote research, education, clinical studies (including diagnosis and treatment), conferences and symposia on all aspects of amyloidosis worldwide.

The mission of Pfizer Global Medical Grants is to accelerate the translation of science into quality patient care through independent grants, partnerships, and collaborations. Pfizer Global Medical Grants supports the global healthcare community's independent initiatives (e.g., research, quality improvement or education) to improve patient outcomes in areas of unmet medical need that are aligned with Pfizer's medical and/or scientific strategies.

This Request for Proposals (RFP) is being issued by both organizations. An expert review panel will be selected by ISA and will make decisions on which proposals will receive funding. Grant funding will be provided directly from Pfizer.

### **Competitive Grant Program Eligibility**

<b>Geographic Scope</b>	<ul style="list-style-type: none"><li>• Global</li></ul>
<b>Applicant Eligibility Criteria</b>	<p>To be eligible:</p> <ul style="list-style-type: none"><li>• Do <u>not</u> include the name of the potential fellow(s) in application materials. This grant will be awarded to an institution, not an individual.</li><li>• Institutions with fellowship programs that include independent research and a strong mentoring program.<ul style="list-style-type: none"><li>○ Examples of independent research include observational studies and outcomes research studies where the primary focus is the scientific understanding of disease; use of screening tools and their impact on improvement of patient health.<ul style="list-style-type: none"><li>▪ Examples of research that would <b>not</b> be eligible include research involving the study and/or evaluation of any pharmaceutical product and basic science and/or fundamental research (in animal model, in-vitro, etc.).</li></ul></li><li>○ Examples of clinical training include educational time with an interdisciplinary team in review of case examples and relevant didactic training as well as use of tools for improvement in patient health for specific therapeutic areas or conditions.</li></ul></li></ul>

	<ul style="list-style-type: none"> <li>• Fellow time spent in the clinical setting that is supported through grant funds must not be billed as patient care.</li> <li>• No aspect of the fellowship program can benefit Pfizer’s business or a Pfizer asset.</li> </ul>
