

Pfizer Research Grant Request for Proposals

Competitive Grant Program – Pfizer Internal Review Process

Clinical Research Studies of Atirmociclib in HR+/HER2- and/or HER2+ Breast Cancer

Overview

This competitive program is designed to support interventional Investigator Sponsored Research aimed at generating clinical evidence for atirmociclib in combination approaches in HR+/HER2- metastatic breast cancer (mBC) and/or HER2+ breast cancer. This RFP has two phases: Phase 1 requires applicants to submit a Concept application. Selected Concepts will then be invited to Phase 2, where applicants submit a full proposal for review.

Geographic Scope

Brazil, Mexico, Canada, Australia, France, Germany, Italy, Spain, United Kingdom, China, Japan, Korea, Taiwan, United States

Project Types and Areas of Interest

Projects that will be considered for Pfizer support will focus on:

- Post-Adjuvant CDK4/6i Recurrence Biology
- HR+/HER2- mBC Atirmociclib Combination Strategies
- HER2+ BC Atirmociclib Signal-Seeking Studies

See section II. Requirements for more details

Key Milestones*

**Dates in blue are estimates*

Funding Range and Project Length

This RFP has a total budget of \$8,000,000 for up to 6 selected clinical studies

Project length is 3 years.

I. Eligibility

Geographic Scope:

- Brazil, Mexico, Canada, Australia, France, Germany, Italy, Spain, United Kingdom, China, Japan, Korea, Taiwan, United States

Applicant Eligibility Criteria

- The institution and Principal Investigator (PI) must be based in one of the eligible countries noted above.
- Only organizations are eligible to receive grants, not individuals or medical practice groups (i.e., an independent group of physicians not affiliated with a hospital, academic institution, or professional society).
- If the project involves multiple departments within an institution and/or between different institutions / organizations / associations, all institutions must have a relevant role and the requesting organization must have a key role in the project.
- The PI must have a medical or postdoctoral degree (MD, PhD, or equivalent), an advanced nursing degree (BSN with a MS/PhD), or a degree in Pharmacy, Physiotherapy, or Social Work.
- The applicant must be the PI or an authorized designee of such individual (e.g., PI's research coordinator).
- The PI must be an employee or contractor of the requesting organization.
- Requesting organization must be legally able to receive award funding directly from Pfizer Inc. We strongly recommend that applicants confirm this with their organization or institution prior to submitting an application. Grants awarded to organizations that are subsequently found to be unable to accept funding directly from Pfizer Inc. may be subject to rescission.

II. Requirements

Primary Area of Interest:

- Breast Cancer

General Area of Interest for this RFP:

- Clinical translational research in post adjuvant CDK4/6i progression to illustrate genomic profiles and relevant treatment strategies
- Clinical studies of atirmociclib in HER2+ disease to explore its potential clinical utility in selected patients. (eBC could be considered if sufficient data support the study in this potentially curative setting).
- Clinical studies of atirmociclib in HR+ mBC in combination with existing or emerging Standard of Care (SoC) (not overlapping with ongoing clinical trials and with commitment of novel drug supply from a third party).

The following will generally be considered out of scope:

- Duplicative research or overlap with planned or ongoing studies
- Non-breast cancer indications
- Comparative clinical studies
- Early breast cancer (eBC) studies that lack supporting data to be tested in the curative setting
- Interventional studies outside defined primary areas of interest above
- Real World (RW) studies
- Pre-clinical studies

Expected Approximate Monetary Range of Grant Applications

IMPORTANT: Grants will be distributed following a fully executed agreement and submission of Final Protocol, Documentation of IRB/IEC Approval, Regulatory Approval (if applicable), Exemption or Waiver.

- Up to 6 individual projects will be selected. The estimated total available budget related to this RFP is \$8,000,000.
- Award amounts include direct costs, institutional overhead costs (capped at 28% per Pfizer policy), and indirect costs.
- The amount of the grant Pfizer will be prepared to fund for any project will depend upon the internal review panel's evaluation of the proposal and costs involved, and will be stated clearly in the grant agreement.

Key Dates:

IMPORTANT: Only accepted Concepts will be invited to submit full proposals.

Concept Submission Deadline: 12 JAN 2027

Anticipated Concept Notification Date: 05 MAR 2027

IMPORTANT: Be advised applications submitted after the due date will not be reviewed.

*Please note the deadline is 23:59 Eastern Standard Time (e.g., New York, GMT -5)

How to Submit:

IMPORTANT: Please read this section carefully since applications submitted not following these instructions will not be accepted and will be cancelled.

- Click here to navigate to this Competitive Grant Program's unique [Program Application Form](#)
 - First-time users should create a Requester Portal account by clicking **Not a member?**
- OR
- Navigate to: <https://pfizermarcie.my.site.com/pfzrequester> and sign in.
 - In the upper navigation bar, click **Grant Programs** to see all available programs.
 - Select **Research**
 - Click **Apply** on the **2027 ONC G Atirimo Breast Ca RES** to open the Program Application Form.
 - Requirements for submission:
 - Complete all required sections of the online application
 - **IMPORTANT:** Upload proposal (see Appendix) in the Proposal/Protocol field.

For more information on navigating Pfizer's new grant management system (MARCIE), please refer to this helpful [User Guide](#).

Questions:

- Please click [here](#) to view “Frequently Asked Questions” regarding the Competitive Grant Program.

If you have questions regarding this RFP, please direct them in writing to the Grant Officer, Lori Carpenter (Lori.Carpenter@Pfizer.com), with the subject line “2027 RFP - Atirmociclib Breast Cancer RES”

Review and Approval Process

Grant requests received in response to a general RFP are reviewed by Pfizer to make final grant decisions.

Mechanism by which Applicants will be Notified:

- All applicants will be notified via email by the dates noted above.
- Applicants may be asked for additional clarification during the review period.

Grant Agreements:

- If your grant is approved, your institution will be required to enter into a written grant agreement with Pfizer. Please click [here](#) to view the core terms of the agreement.
- Under Pfizer's competitive grant program, modifications to grant agreements will not be reviewed unless a genuine conflict exists as between applicable law and the terms of the relevant grant agreement. Applicant is encouraged to share the core terms with counsel for approval prior to submitting an application.
- Except where prohibited by applicable law and, in any case, subject to review by Pfizer Legal, payment of grant funding may only be paid to the grantee organization.
- This RFP is supported by Pfizer Inc. and, if approved, payment will be sent from the United States.

About Pfizer Grants

Pfizer supports the global healthcare community's independent initiatives (e.g., research, quality improvement or education) to improve patient outcomes in areas of unmet medical need that are aligned with Pfizer's medical and/or scientific strategies.

Pfizer's competitive grant program involves a publicly posted general Request for Proposal (RFP) that provides detail regarding a general area of interest, sets timelines for review and approval, and uses an internal Pfizer review process to make final grant decisions. Organizations are invited to submit an application addressing the research gaps as outlined in the specific RFP.

For all Investigator Sponsored Research (ISRs) and general research grants, the grant requester (and ultimately the grantee) is responsible for the design, implementation, sponsorship, and conduct of the independent initiative supported by the grant, including compliance with any regulatory requirements. Pfizer must not be involved in any aspect of study protocol or project development, nor the conduct or monitoring of the research program. An ISR grant request cannot be submitted for a study that has already commenced and was not originally supported by Pfizer.

Appendix

IMPORTANT: RFP Submission Requirements

The Concept will be accepted via the online application. When answering the Concept questions in the application please keep the following in mind:

Goals and Objectives

- Provide the main goal of the study and the study population (if applicable). Provide a detailed definition that is directly linked to the primary objective.

Assessment of Need for the Project

- This should reflect your study rationale. Provide a brief description of the medical/scientific question and the rationale of how this trial or study addresses the question.

Target Audience

- Describe the primary audience(s) targeted for this project. For Investigator Sponsored Clinical Trials, please specify the age, gender and other demographic information for trial population.
- Also indicate whom you believe will directly benefit from the project outcomes. Describe the overall population size as well as the size of your sample population.

Project Design and Methods

- Describe concisely the research design and methods for achieving the stated goals. For a clinical interventional study, include inclusion/exclusion criteria, treatment plan and statistical plan.

Innovation

- Explain what measures you have taken to ensure that this project idea is original and does not duplicate other projects. Describe how this project builds upon existing work, pilot projects, or ongoing projects developed either by your institution or other institutions related to this project.

Evaluation and Outcomes

- Specify type and frequency of safety, efficacy, and/or outcome measures. Also indicate the method(s) used to assess measures.
- Provide a publication plan describing intended submission of abstracts to (a) congress(es) or intended submission of (a) publication(s) to peer-reviewed journals.

Anticipated Project Timeline

- Provide an anticipated timeline for your project including project start/end dates.
- An ISR grant request cannot be submitted for a study that has already commenced and was not originally supported by Pfizer.

Additional Information

- If there is any additional information you feel Pfizer should be aware of concerning the importance of this project, please summarize here.
- Early-career applicants: Letter(s) of support from mentor(s) and collaborators describing how the award will advance the applicant's career.

Organization Detail

- This information is used to assess the capability of the organizational resources available to perform the effort proposed. Identify the facilities to be used [laboratory, animal, clinical and "other"]. If appropriate, indicate their capacities, pertinent capabilities, relative proximity and extent of availability to the project.

Budget Detail

- A total amount requested is the only information needed for the Concept stage. Full Budget is not required. This amount can be adjusted at the Full Proposal stage as applicable.
- The budget amount requested must be in U.S. dollars (USD).
- While estimating your budget please keep the following items in mind:

- General organizational running costs such as legal fees, insurance, heating, and lighting etc. should be included in an Institutional Overhead (if required). These costs are not specific to a grant request and therefore, should not appear as line items in budgets. However, costs that are specific to the study (e.g., some countries require insurance to be taken out on a per-study basis for clinical research) would be acceptable to be included as line items.
- The inclusion of these costs cannot cause the amount requested to exceed the budget limit set forth in the RFP.
- Pfizer does not provide funding for capital purchases (infrastructure expenses such as equipment, purchases of software or software licenses, technology or bricks and mortar). Equipment hire/leasing is acceptable and may be included in project budget.
- It should be noted that grants awarded through GMGP cannot be used to purchase Pfizer therapeutic agents (prescription or non-prescription).
- Pfizer maintains a company-wide, maximum allowed overhead rate of 28% for independent studies and projects. Please [click here](#) for details.

Required Documents

- Project Plan or Proposal
- Initial Study Protocol (by invitation for selected Concepts only)
- Budget, including request for drug
