

REDUCING OR ELIMINATING PATIENTS' OUT-OF-POCKET COSTS
FOR BIOSIMILARS **COULD LEAD TO INCREASED USE BY
PATIENTS AND SAVINGS** IN THE U.S. HEALTH CARE SYSTEM.

U.S. taxpayers
could save up to

**\$5.2
BILLION**

over the next decade¹

Seniors could
save up to

**\$3.3
BILLION**

over the next decade²

HERE'S HOW **BIOSIMILARS** COULD SAVE SENIORS AND U.S. TAXPAYERS BILLIONS IN HEALTH CARE COSTS.

Biosimilars represent an opportunity to improve the health and well-being of millions of Americans and could save the U.S. as much as

\$54 BILLION

over the next decade¹

How can we **bring these savings associated with biosimilars** to the U.S. health care system and reduce costs to the Medicare program?

Reducing or eliminating patients' out-of-pocket costs for biosimilars could lead to increased use by patients and savings in the U.S. health care system.

U.S. taxpayers could save up to

\$5.2 BILLION

over the next decade²

Seniors could save up to

\$3.3 BILLION

over the next decade³
