

Kalamazoo Manufacturing Site Overview

Pfizer's Kalamazoo manufacturing site in Michigan was established in 1948 and currently employs approximately **3,300** employees and contractors. Pfizer has had a long-standing presence in the greater Kalamazoo community since 1886 through a legacy organization, The Upjohn Company.

The 1,300-acre facility is the largest manufacturing site in Pfizer's network.

Pfizer Kalamazoo is one of the **U.S. finishing plants manufacturing Pfizer and BioNTech's COVID-19 vaccine.**

To date, Kalamazoo has manufactured nearly **1B doses of the vaccine.**

The Kalamazoo facility worked through the pandemic to not only produce and ship Pfizer and BioNTech's COVID-19 vaccine but also to ensure continuous supply of other critical medicines.

A range of diverse specialists support the Kalamazoo facility, including scientists, engineers, quality assurance and laboratory analysts, formulation and filling line specialists, and packaging and logistics experts.

Pfizer Kalamazoo is **one of the world's largest producers of active pharmaceutical ingredient (API)**. It also manufactures drug products (DP) and medical devices:

Annually produces **1,200** metric tons of active pharmaceutical ingredient

Annually produces **133M** units of life-saving medicines, both sterile injectables and liquids/semi-solids

Annually ships API, drug products, and medical devices to **120 countries** around the world

- In March 2022, Pfizer broke ground on one of **the most technically advanced** sterile injectable pharmaceutical production facilities in the world – known as the Modular Aseptic Processing (MAP) facility – in Kalamazoo, Michigan.
- The facility is a multi-story, **420,000-square-foot** production engine that will strengthen Pfizer's capability to produce and supply critical, life-saving injectable medicines for patients around the world.
- The expansion is adding approximately **450 new jobs** in Kalamazoo County. Pfizer projects a **total investment of \$1.1B** in Kalamazoo through 2024.

In addition to the COVID-19 vaccine, major products produced at the site include the following:

Sterile Injectables: Vfend, Dynastat, Solu-Medrol, Elelyso, Eraxis, Solu-Cortef, Thrombin, Depo-Medrol, Depo-Provera, Depo-Testosterone, Atgam, Bevacizumab and Coral Snake Antivenin

Liquids and Semi-Solids: Cleocin, Zyvox, Ibrance, Eucrisa, Synarel and Zithromax
