

There are  
**7,000+**  
KNOWN RARE  
DISEASES  
WORLDWIDE.

Of these,  
**80%**  
ARE  
GENETIC  
IN ORIGIN,

which affect an estimated  
**280 million**  
PEOPLE WORLDWIDE.

Pfizer Rare Disease wants to go beyond helping people manage their diseases, enabling them to thrive in every stage of life through a potentially transformational treatment approach called **gene therapy**.
