

First Fridays Webinar Series:  
Medical Education Group (MEG)

# Think Globally, Empower Locally: Crossing Borders to Improve Quality of Care

December 3rd, 2010

## Agenda: Think Globally, Empower Locally

1. Introduction
2. **Topic One: Partnerships Across Sectors in Global Health Improvement**
3. **Topic Two: Impact of Technology & Innovation on Improving Patient Outcomes**
4. Q and A

## Today's Objectives

Upon completion of today's call participants should be able to:

1. Assess capacity for change and implementation of new organizational strategies to establish a global footprint and revolutionize approach towards international medical education
2. Apply lessons from a case study of collaboration and identification of local needs and barriers to build capacity and infrastructure for sustainable improvement modules
3. Incorporate technology and innovation into global planning as a means to continuously improve efficiency, communication, error mitigation, decision making and patient outcomes

## Polling Question: Placeholder

Please advise your level of involvement in international medical education :

1. Current & future focus is predominantly US
2. Current focus is predominantly US, but interested in expanding scope to international
3. Current focus is US, but have been involved in international education at a beginner level
4. Current focus is US, but have expertise in international education
5. Current focus is predominantly international

## How Do We Adapt to a Rapidly Changing & Diverse Global Healthcare Environment while Unifying 195 Countries?

### What do we know?

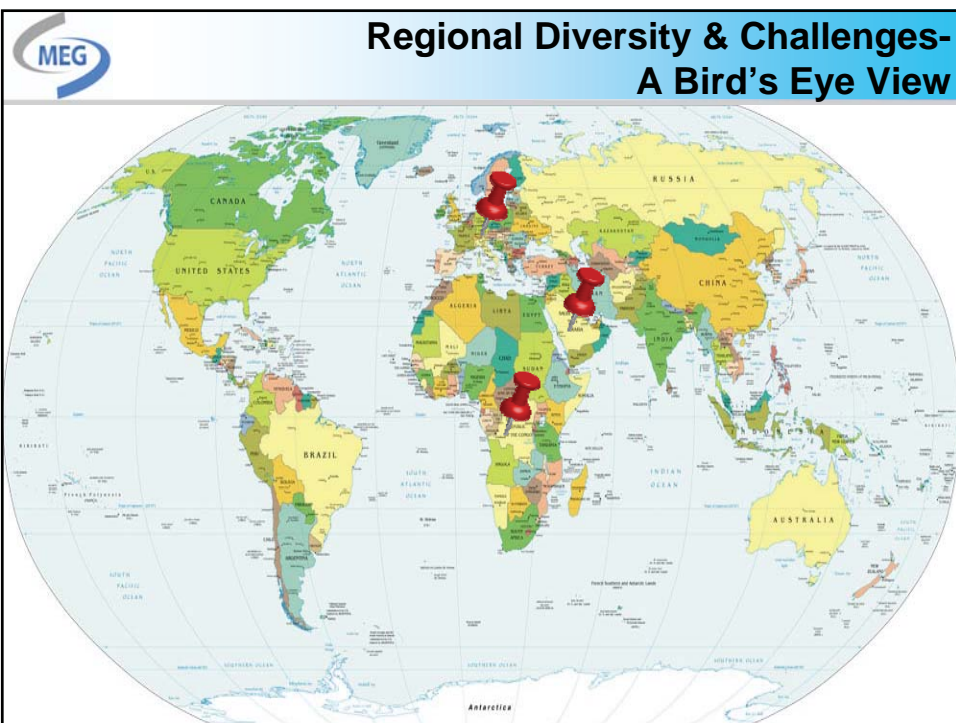

- Medical advances & knowledge not limited by geographic boundaries
- Development, implementation & role of Medical Education/CPD among regions remains extremely diverse
- Communication across continuum of care not prevalent
- Medical Education/CPD is not defined or mandated consistently across the globe- concept of lifelong learning not prevalent
- Medical education content is not always unbiased/based on validated evidence & accepted standards of care

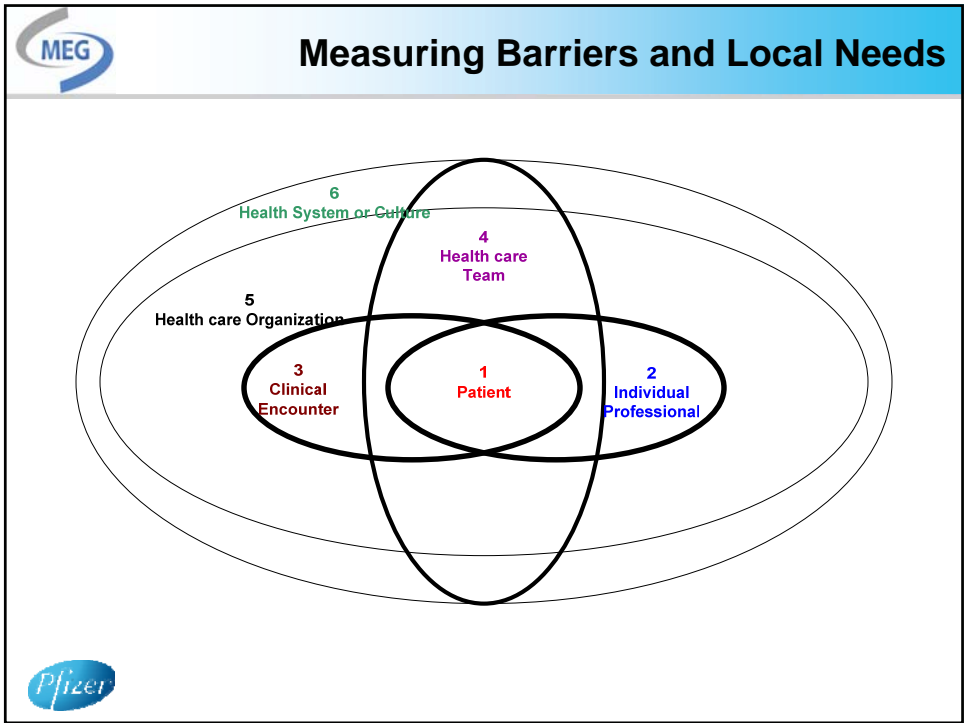

## How Do We Adapt to a Rapidly Changing & Diverse Global Healthcare Environment while Unifying 195 Countries?

### What do we know?

- Educational solutions are often based on perceived needs, rather than measured & documented needs
- Educational solutions often don't account for local practice gaps
- Barriers vary across regions- methods to identify and remove barriers often not accounted for
- Learning preferences & patterns vary across regions
- No standard approaches for assessing competency, practice performance and measuring educational outcomes
- Accreditation can be complex-activities rather than providers often accredited

**Global Health Improvement: Call to Action**

Impact Global Health through a collaborative partnership to improve the knowledge, performance and competence of HCPs, while accounting for local barriers and needs, to ensure high quality healthcare and improved patient safety and outcomes world-wide

MEG Pfizer

## What is Pfizer Doing to Establish a Global Footprint?

- Exploring global healthcare improvement strategies
- Support of Advisory Boards using medical education experts to understand global needs, priorities & barriers to adoption in regions
- Established International Pharmaceutical Alliance for CME & International Benchmarking Working Group
- Actively involved in Global Alliance for Medical Education
- Developing Global CME/CPD best practices & guiding principles in collaboration with other healthcare sectors

## Think Globally, Empower Locally

US rules & regulations differ in respect to the development, support and participation in/of Medical Education/CPD of HCPs

What role should each sector below play in improving global health and patient outcomes and what guiding principles should be established?

<http://www.surveymonkey.com/s/cornerstonesofglobalmedicaleducationcpd>

- Pharmaceutical/Medical Device/Biotech Company
- Medical Education Provider
- Medical Society/Association
- Healthcare System (Medical Center, Ministry of Health, Insurers, etc)
- Healthcare Professional
- Patient Advocacy Groups/Patients
- Regulating Bodies

## Partnerships Across Sectors in Global Health Improvement

Case Study: Spotlight on Regional Needs & Barriers and the Impact of Collaborative Efforts in Sierra Leone, Africa

Adam L. Kushner, MD, MPH, FACS

Founder & Director, Surgeons OverSeas (SOS)

Lecturer in Surgery, Department of Surgery at Columbia University

## Case study: Regional Needs and Barriers

### The Surgeons OverSeas (SOS) model

Adam L. Kushner, MD, MPH, FACS  
Founder & Director, Surgeons OverSeas (SOS)  
Lecturer in Surgery, Columbia University

## Sierra Leone: SOS First Target Country

In 2007:

- Bottom of UN Development Index
- Highest infant mortality
- Life expectancy of 40 years
- 6.5 million people
- Size of South Carolina w/ population of San Francisco and Chicago combined

## Impact of Technology & Innovation

Technology can serve as a catalyst in transforming the healthcare landscape and improving global health. It can prove beneficial when interwoven seamlessly into the education curriculum. The end product of effective education should be developing learners that are capable of creating new and effective pathways rather than those who repeat history.

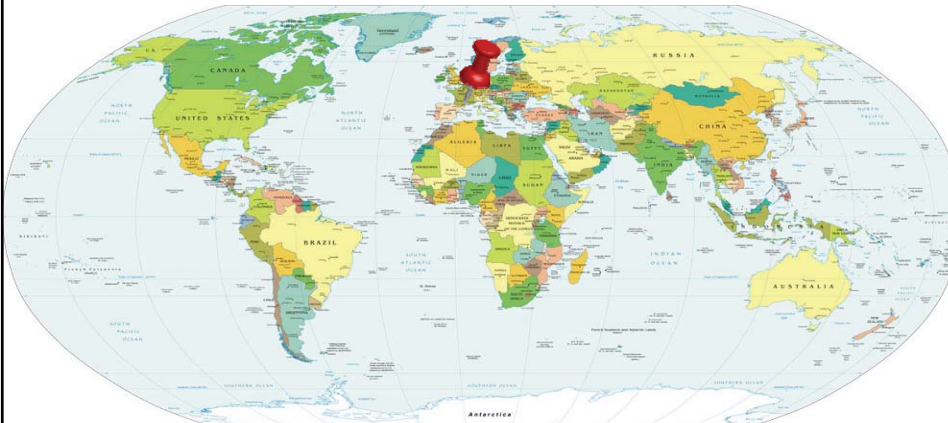

## Impact of Technology & Innovation

New Frontiers: Is it Time for Medical Education to Step Outside the Box to Improve Patient Outcomes Through Technology & Innovation?

Denise Silber, MBA

Partner, Health 2.0 Europe 2010, Founder Basil Strategies, Organizers of Doctors 2.0 & You, 2011, President of French Association for Health Internet Quality

# Avenues of Improvement 6 MedEd on Patient Narrative

**What is this about?**  
 Patient Opinion is a free online platform for patients to share their experiences of healthcare, and to discuss the impact of their condition on their lives.  
 It is a place where you can share your story, get support and advice, and meet other people who have similar experiences.

**Latest Patient Opinions**  
 I want to thank all the nurses...  
 I had a Oxford partial knee re...

**Your opinion**  
 Write your own opinion or reply to other people's opinions.  
 You can also share your opinion on social media.

**Compare hospitals**  
 Find out how your hospital compares to other hospitals in your area.

eHealth Partners

650k cancer patients  
 Support mailing lists are similar to traditional offline self-help groups that they are "composed of members who share a common condition, situation, heritage, symptom or experience"

Directing patients to more appropriate facilities, HCP, treatments.

# Clinical Benefits

sundhed.dk

## Features: *Health professionals*

- Information for GP (log on)
  - Quick access to laboratory data
  - ICD search of diagnoses from GP's electronic healthcare program (Linksportal)
  - Online access to Medical Handbook (open for all users, but aimed at GPs)
- All Health care professionals (log on)
  - eMedicine records
  - Electronic patient records etc. (almost total coverage of the 5 regions)
  - Waiting list information from hospitals
  - Cochrane library
- Regional and national information
  - Contact information (authorities, departments, health personnel)
  - Information on referral principles to hospitals/regions
  - Preventive medicine
  - Health laws and regulations
  - Laboratories and consultants

## Features: *Citizens/Patients*

- Directory of names and addresses
  - Contact information
  - E-services (booking, prescription renewal, consultation) (log on)
  - E-commerce (pharmacies) (log on)
  - Comparison of prices, quality and accessibility
- Information about prevention and treatment
  - Medical information (eg. information about treatments)
  - Waiting list information from hospitals
  - Patient satisfaction measures on every hospital dep.
  - Smilcys for every hospital
  - Preventive medicine
  - Health laws and regulations
  - Patient to patient dialogue – connecting patients coping with similar issues
- Access to own health data (log on)
  - Cross-sectional personal electronic medicine profile
  - Patients' medical history (since 1977)
  - Electronic Health Record (from hospital records)
  - Online Donor Registration and access to own data

Conference

Doctors 2.0™ & You June 22-23, 2011 PARIS, FRANCE by BASIL strategies

Home About Venue Agenda Speakers Medias Sponsors Register

Welcome to Doctors 2.0™ & You – June 22-23, 2011 – Paris  
Outstanding conference, outstanding venue! Mais oui!

How are Doctors using Social Media, Apps, and Web 2.0 Tools to work with Patients, Colleagues, Governments, Industry, Payers? There is so much excitement about Web 2.0 and Social Media in Health Care, but do we know what physicians and other health care professionals are actually doing online?

Don't miss THE 2011 Europe-based conference, on these critical questions.

Doctors 2.0™ & You conference will be highly interactive, with workshops, contests, live tweeting, and interactive voting.

Doctors 2.0™ & You is organized by Basil Strategies, an eHealth eMarketing consultancy, founded by Denise Silber to help healthcare organizations take advantage of New Technologies, Health 2.0 tools and Social Media. Basil Strategies was co-organizer of Health

## Global Planning: Questions to Consider?

Can a global curriculum serve the needs of HCPs and patients in all countries?

- What are the barriers faced globally?
- Who should we partner with locally?
- How do learning preferences differ?
- What are the needs of your target audience?
- What adaptations need to be made to accommodate those needs?
- Ideally, how can you build a learning platform that is sustainable?
- How can technology and innovation serve as a catalyst?

## Until Next Time...

- Think Globally, Empower Locally
- Please join us for our next webinar – It's All About the Patient:
  - Friday January 7<sup>th</sup>, 2011
  - 11am ET
- We are currently evaluating topics for 2011 – please submit your ideas and suggestions to [mededgrants@pfizer.com](mailto:mededgrants@pfizer.com)
